Appendix (May contain code, survey data and other such stuff)

- Heading “CHAPTER I” is Heading 1 from MS Word template.(pre defined headings)
- Title is Heading 3 from MS Word template. (pre defined headings)
- Heading 4 of the template for level-1 heading, Heading 5 for level-2 and level-3 heading and so on.
- All text will be of Times New Roman with font size of 12 and line spacing of 1.5. Text must be justified (aligned to both the left and right margins).
- You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font). To create multileveled equations, it may be necessary to treat the equation as a graphic and insert it into the text.

Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1.1), using a right tab stop. To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Punctuate equations with commas or periods when they are part of a sentence, as in

$$\alpha + \beta = \chi. \quad (1.1)$$

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use

“(1.1)”, not “Eq. (1.1)” or “equation (1.1)”, except at the beginning of a sentence:
 “Equation (1.1) is . . .”

- *Positioning Figures and Tables:* Place figures and tables at the top and bottom. Avoid placing them in the middle. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation “Fig. 1.1”, even at the beginning of a sentence. Caption Font and table text is of Times New Roman with font size of 10 and table footnote of size 8.
